JUST-PATCHX

Preimpregnated liner
for Just-Light UV Packer

Just-PatchX

Our Just-PatchX pre-impregnated liner with UV blocking foil makes patch repairs simpler. There's no need to impregnate fiberglass yourself. With the liners single-component resin, you avoid the stress often associated with traditional two-component silicate repairs. You have all the time you need to position the patch correctly - as long as it's kept out of direct sunlight.

Flexible lengths

Available for DN100, DN150 and DN250. Supplied in sealed containers in lengths up to 20 m with a shelf life of at least 6 months. Can be cut to size or ordered in custom lengths for a perfect fit.

Clean preparation

The protective foil stays on the liner to minimise resin spillage on tools, cables, hands and clothing. Cut 5 cm off each end and perforate the remaining foil before mounting. This ensures good end adhesion and minimises resin waste during insertion.

Strong UV bond

Pre-impregnated with powerful Just-Cure UV resin and protected by UV blocking foil against accidental curing. The perforations allow resin to press through during installation, creating a strong bond. The resin does not shrink and adheres firmly to the pipe.

Advantages:

- ✓ No impregnation time
- ✓ No mess
- ✓ Long shelf life
- ✓ Quick installation
- ✓ Available in 20-meter lengths
- ✓ Custom lengths available to fit your UV Packer

UV blocking foil

**Transparent pipefoil
underneath the UV-foil**

Flexible lengths

Delivered in 20-meter boxes or custom lengths for your UV Packer, wrapped in UV foil.

Accessories:

Cutting roller

Perforate the transparent pipe foil to prevent resin spillage and ensure adhesion to the pipe.

Art.no.: 0171259

Universal Pro scissor

Easily cuts through the impregnated glassliner.

Art.no.: 0196443

Available sizes & accessories

Just-PatchX is available in pipe sizes DN100, DN150, and DN250 mm. The liner comes pre-impregnated in lengths of up to 20 meters and is shipped in a sealed box. A 20-meter liner can be cut to the desired length to fit your UV Packer and has a shelf life of at least six months. Alternatively, it can be ordered in a custom length for a perfect fit.

Just-Cure UV resin

Just-PatchX is pre-impregnated with our powerful Just-Cure resin, ensuring a strong and durable bond. It is further protected by UV foil to prevent accidental curing of the resin.

The resin does not shrink and adheres firmly to the pipe.

- ✓ DN100-DN200
- ✓ Pre-impregnated & ready to use
- ✓ Tools for easy preparation
